Skip Carden - EDITOR

1988 EOC CONVENTION - JUNE 29 - JULY 2nd AMES IOWA

I want to call your attention to the upcoming election of the EAA Antique and Classic Division to be held in June. Those of you that are members will receive a ballot in your next issue of ANTIQUE AND CLASSIC MAGAZINE, I would urge you to exercise your option and VOTE. This year we have the rare opportunity to elect someone who has been a great help to Ercoupes and The Ercoupe Owners Club. The person that I refer to is Butch

Joyce, Butch has been active in the Antique and Classic division for many years and has provided the guidance and knowledge that has made the division

grow. Butch is the person who makes the arrangements for the Type Club activities at Oshkosh and Lakeland. He has also been active in the EAA Antique and Classic Chapter #3 and has held almost every office available in this organization. Butch is well qualified to be the president of the Antique and Classic Division and I believe that under his leadership it will enjoy new growth and vitality. So don't let the

opportunity to be a part of the decision making process pass you by VOTE for BUTCH! -Skip-

This is the last issue that you will receive before the National Convention. I urge all of you to make plans to attend if at all possible. Shirley Brittan and her group have made every effort to see that you will have a good time. They have planned tours, informative lectures and programs for you. I also understand that the college accommodations are the very best yet. As of this writing Fred and Dorothy Weick still plan to be in attendance. So make your plans to attend and to enjoy our National Convention.

I was told today that one of the new pilot magazines has an article on the Twin Ercoupe, I understand that it is in the June issue. You will recall that we published a similar about 15 years ago. I also have a short amount of footage of the Twin Coupe flying at an airshow and I plan to have it converted to a VHS format and will have it at Ames for those who want to see it.

I have recently looked into the possibility of having the ALON put back into production but have changed my mind since talking to several aviation experts. I had thought that we might talk Mr. Millar, the new president of Piper into building this airplane again as they have no plans to build the Tomahawk again and I thought that the Alon would be a good 2 place trainer for him. I talked to Steve Dyer at Univair and the Alon project can be purchased by a reliable principal. The people at Piper tell me that the new trend in training is use of 4 place planes like their Warrior series and flying three students at a time, making instruction and flying time more productive and at less cost. I was also told that to produce the Alon

in today's market would end up costing about \$40,000.00 or \$50,000.00 per copy. After a careful look at the market it was determined that it would be hard to sell for that amount, even though it is a great little airplane. The moral of this is if you have a nice Ercoupe or Alon then you better darn well take good care of it as a new one would cost a bundle. As you probably have heard Mr. Millar has purchased the rights to the Swift and will probably put it in production if he gets enough interest, the price for it is reported to be in the \$80,000.00 to \$100,000.00 range with a limited production run and probably most of them will be sold before they are made. So I hold little hope that the Alon will go into production again as long as the costs are in this range. -Skip-

Members in the NEWS, Bob Sanders, was the subject of a recent article in the AOPA General Aviation News-April issue. Bob was the last one to sell the Ercoupe before the Forney and was also a close associate of Fred Weick. The article mentions Mr. Weick and his contributions to aviation and aviation safety. I am saving the article and may re-print in a future issue.

DO YOU KNOW

In talking with our Insurance Advisor I learned that there is a definite shortage of GOOD QUALIFIED Ercoupe Instructors. We are asking that if you know such a person who is a CFI with a minimum of 300hrs single engine instruction and at least 3hrs of PIC time in an Ercoupe and would be willing to give BFRs to Coupe owners then I think that we will be able to get an additional discount on our insurance. If you know of someone like this PLEASE send me their name address and telephone number so that I can make them part of a permanent list to be included in each issue of Coupe Capers.

Also I want to have a list of Qualified Ercoupe Mechanics. If you know of such a person send in

their name and address and I will also print this in Coupe Capers. This is a service that we need to provide for our members. Many of us are at the mercy of mechanics who do not like or appreciate the Coupe and as a result many times annuals look like major overhauls instead of checkups. We end up paying for the mechanic to learn about Coupes, on our time. This is a needed service and I hope all will respond. -Skip-

AREA NEWS

Steve Kish is still working for The Ercoupe Owners Club and its members although he was not re-elected as a director of Region 6. Steve has sponsored several Flyi-Ins for the area Coupers and prints a real informative newsletter called "Coupe Scoopes". If you would like to receive Steve's newsletter I am sure he will be glad to send it to you for some stamp money. This like all our regional Newsletters is published as a service to members in a certain location by a person who is volunteering their time and funds to doing it. We are fortunate to have several "Regional" newsletters within our club. If you want to receive one of these letters then contact them direct and they will put you on the mailing list. As you know I get them all and often times take material from them and reprint it in Coupe Capers because of the merit of that item. We are very fortunate to have so many talented persons who are helping to promote Coupes. A special thanks to Steve Kish and all of our Newsletter Editors !

REGIONAL REPORT

China Lake Naval Weapons Center China Lake, California

The "Coupe Group" of Hesperia Airport was chosen to have their airplanes displayed to the general public at the Open House at China Lake on Saturday, April 16, 1988. Wayne Olson, Ed Bilewitch, and Bob Beverly Elliott departed

Hesperia at the early hour of 5:15 AM to meet their scheduled arrival "window" of 6-6:30 AM at the Naval Air Station. The route required a detour around restricted area 2515. Arrival at the air base was via a high speed (150 MPH) pass with a 360 degree right break. Arrival was met by the Base Commander with coffee and doughnuts. Even at this early hour, traffic was backed up Ridgecrest awaiting the opening of the gates at 7:00 AM.

Other aircraft on display included a Waco cabin biplane, Navy N3N, Pilatus Porter, Grumman TBF, Spitfire and a Harlow. The air show consisted of aerobatic flights by a Waco UPF-7 and T-6 by civilian pilots, and a demonstration of the AV-8 Harrier and Cobra helicopter by the military. The featured attraction was the Blue Angels flying their F-18 Hornets in close formation aerobatics. Especially interesting was the performance of the Harrier with its capability of flying backwards, hovering and climb. Also impressive was the Cobra. The cloud cover gave ample ceiling for maneuvering and provided a good background for viewing.

Also included were ground displays of various ordinance. Plan on attending one of the military open houses and see how your tax dollars are being spent. The next open house will be a George Air Force Base on October 30, 1988, with the Thunderbirds featured.

Bob Elliott

Medical Expenses

This is an interesting section of our special "members only" group insurance policy. We have some liability coverage for YOU the pilot! Many companies charge extra for this coverage. Our liability policy includes - at no charge - \$500 for each occupant of your aircraft (including YOU the pilot for a pleasant change) and you can add up to \$2500 coverage per occupant for only \$43. I had a long talk with our underwriter about this

coverage when we put our special program together. This is important coverage for you as well as your family and friends.

Nobody out there likes to read insurance policies...so, what our policy sez is: "We ('we' being the insurance company) will pay the reasonable and necessary medical and funeral expenses incurred within one year of an occurrence for bodily injury to you and any passenger while the aircraft is being flown by you or with your permission." The policy goes on "...passenger: means any person who is in or on the aircraft, or who is getting in, on or out of the aircraft."

This is sort of "no fault" insurance and it is payable directly to the injured person, the person responsible for payment or the person or organization that provided the medical or funeral service. If this coverage looks redundant when compared to your liability coverage ... it is. Medical payments coverage provides "right now" money with no waiting for claims forms, lawyers and the due process, ad infinitum, et ad nauseam.

My ringing phone tells me that you folks are reading these articles (big smile now graces the old Commander's face) so I know you recall our fable about our intrepid aviator taking his old maid second grade school teacher flying when suddely the ramp person clad in her Guchi poncho runs into the moving prop. Let's go back to that thrilling saga and look at our Medical Payments coverage. As you recall, dear reader, our liability coverage took care of the ramp person's designer poncho and her bruised finger after the jury made all those awards. Her other uncle (not the one who is the best trial lawyer in America) happened to be a medical doctor, so he took care of her bruised finger and patently waited for his fee from the jury. Our ramp person could have gotten her uncle his money right away because our mythical sky zoomer had Medical Payments coverage. Remember we give everyone of our

member insureds 500 bucks worth of it, like it or not! Unkie could have been paid directly or the ramp person could have gotten the money, spent it on another poncho and then fought it out with her irate uncle.

But wait! No happy ending yet. What of the poor but honest maiden school teacher who, in the excitement, departed this transitory life in God's faith and fear? Again, the jury award took care of that - remember the one and only liability limitation on our policy of \$100,000 took effect here. Somebody had to pay for the wake - booze, food and all as well as the send off. The send off expenses would be paid right away under Medical Payments with no waiting for the lawyers to finish debating the number of angels that can dance on the head of a pin. In both cases, the insurance company pays up to the amount of coverage shown under Medical Payments. This is over and above the jury awards so long awaited and no liability is admitted or considered. The wheels of justice grind very slowly except for Ed Meece. Now the happy ending.

You can see why I felt this coverage is important to our members and why everyone gets \$500 included at no charge with higher limits available. I enjoy the phone calls. I get to meet our members and talk flying as well as try to answer your questions. If you have any...just call and I'll do my best. If nothing else I'll tell you about flying my BFR in a P-51D. This is a true story and "worthy of all men to be received."

-Jim Webb-

BACK ISSUES AVAILABLE

I have Back Issued of Coupe Capers available. They are wrapped in handy packages with all the issues for that Volume. You may have noticed that in January we changed the Volume to reflect the calendar year instead of the old system of May to June. I have Volume 16 June-December

1987, \$5.00., Volume 15 June-May, 1986-87, \$10.00, Volume 14 June - May 1986-86 \$10.00. Order from headquarters EOC, P.O. Box 15388, Durham, NC 27704

To: *All Ercoupers*

Shirley Brittian, the Iowa Coupe Group and I have had the pleasure to plan what we hope will be the finest National meeting yet. We have air conditioned facilities at Iowa State University for our use. This includes: meeting rooms, dorm rooms, cafeteria, and the meeting facilities which are all in the same complex. The facilities are nearly new and in excellent shape. You can expect first class facilities at University prices. We have enough rooms that multi-meetings and gab fests can be held at the same time. All of this is just approximately 2 1/2 runway lengths from the airport. For those that want an extra flair, the Four Star Holiday Motel with swimming pool, etc., is less than one runway length from the airport.

We worked hard to arrange enough activities to wet the appetite of everyone. Plenty of technical sessions, fun flying activities, and lots of social activities. You can expect a warm Iowa hospitality, reasonable prices, and a lot to satisfy your thirst of knowledge and pleasure. Come and join us at the National Ercoupe Owners Meeting June 29th to July 2nd. Don't be one of the people that will want to kick themselves, because they missed it.

Ramblin,
Ron
3952H

NATIONAL FLY-IN UPDATE

Here we are in the final count-down for the 1988 EOC National Convention. We in region #9 would like to welcome you to Iowa. A lot of members from this region put out great effort and time in putting it together. Ron Avise (our Missouri wing leader) and wife Marguerite made the 3 hhour drive each way, from Kansas City, every month and never missed a Planning Session. If the weather is good, we should have a super convention.

A big thank-you to all that helped and the ones that have promised to help that week. Now it is up to you members to make it a big success.

We've had calls and letters requesting a longer meeting with more things planned to do. So, hopefully, there will be something for everyone.

As you will note, we have scheduled a separate time for the 1989 Convention Site Selection, so we can keep the banquet uncluttered. This should allow plenty of time for those "happy farewells" for another year, and the presentation of awards - without running so late.

All mettings and seminars will be at the college. I think you will be pleasantly surprised with the outstanding accommodations and prices. We will be in a new area of the university, with excellent food. (We were invited for lunch to check it out.) Meeting rooms and dorm rooms all are spotless, air conditioned and in the same complex.

Meal tickets are available on two plans. (Tickets are preferred as they do not like to handle cash in the dining room.)

One plan offers meals for Thursday breakfast through Sunday breakfast for \$34.50. The other plan excludes breakfast and lunch on Saturday (for those flying to theAmonos... for brunch) for \$28.25.

Short stay gusests may purchase individual meals as they go through the line. Also, individual meal tickets for the banquet and picnic may be purchased. Workers and persons coming

early may eat in the cafeteria on a cash basis for those days.

There are several kennels in Ames, but they close at noon on Saturday and, being a holiday weekend, would be closed until Tuesday AM, July 5th. So, I have made arrangements with an area kennel to pick up pets on your arrival and deliver them on Sunday AM. Please bring your pet's shot record.

A local dance group "Onion Creek Cloggers" will perform at our picnic on Thursday night.

The Friday night train ride is a scenic ride thru 14 miles of Des Moine's river valley countryside, crossing a picturesque 156' high trestle and stopping enroute for a bar-b-que. You will enjoy the beautiful Iowa scenery.

Transportation will be running on a regular schedule from airport to dorms. (We could use a couple more vans and relief drivers if anyone would like to volunteer.)

There will be a \$3.00 tie-down fee at the Ames airport, and don't forget to bring tie-downs.

An afternoon of shopping is scheduled for the ladies as well as a "Pilot's-Pal Seminar". This should be very helpful for non-pilots, what to do in an emergency as well as learning to read a sectional, etc.

We will be in the Willow Residence Hall (a high rise in a group of three - Maple/Willow/Larch). They are on your map - corner of Lincoln Way and Beach Ave. for those driving.

Hope to see you all in Ames. Wishing you a safe trip and God Speed.

Shirley Brittion Iowa Group and all of Region 9

SUMMER 1988 AIR CONDITIONED CONFERENCE HOUSING AND FOOD SERVICE

Maple-Willow-Larch Residence Halls are high rise, air-conditioned residence halls located on the east side of the Iowa State University campus, across from the Iowa State Center. An excellent dining facility serving cafeteria style is conveniently located in a connecting building. Free parking is provided.

Single and double rooms are available. Each room has two twin beds, desks with chairs, a large chest of drawers, and ample closet space. Two bathrooms are conveniently located on each floor. Blankets, pillows, bed and bath linens as well as individual bath soap and drinking glasses are provided. Telephones are available.

Room rates are \$10.00 per person per night for a double and \$16.00 for a single room. Food service rates for Summer 1988 is \$2.75 for breakfast, \$3.50 for lunch, and \$4.25 for dinner.

If you are interested in living in the Iowa State University Residence Halls, please complete and return the Conference Housing Reservation Form.

FOR MORE THAN 12 YEARS...

more CFI's have used the HUSH-A-COM than any other intercom. There must be a reason!

HUSH-A-COM's current limiting circuit is totally different from all others. No squelch or clipping of words. The only system that works well, even in helicopters or open aircraft. Your HUSH-A-COM comes complete with 2 headsets - can be used with 4. (2 year warranty and "push-to-talk" switch)

Order Now for 30 Day Free Trial - You Be the Judge!

Club Price \$315.00pp

ERCOUPE
SERVICE
MEMORANDUM

No. **40**

Ercoupe MEMORANDUM

SUBJECT: Starter Control Clearances

There are two adjustments on the starter control that should be checked at each 100 hour inspection period. The proper adjusting of these clearances will reduce the possibility of the starter being accidentally engaged while the motor is running and provide proper engagement of starter drive pinion when starter switch is engaged.

1. Check Control Lever Clearance:

- Push starter control knob to the full "off" position.
- Measure clearance between the lower end of the shift lever and the plunger on the back of the clutch drive. This should be $1/16"$. (Tolerance plus $1/32"$ minus 0.)
- If not correct, adjust as follows:

- (1) Disconnect clevis from control lever by removing clevis pin.
- (2) Loosen lock nut on clevis, make adjustment as necessary, and tighten lock nut.
- (3) Connect starter control back on to the control lever and safety clevis pin.

2. Check Pinion Travel:

- Check to see that there is $9/16"$ travel on the pinion with the cranking motor switch fully closed. Check by measuring the movement of the clutch as the control lever is moved.
- Adjust, if necessary, with the adjusting stud on control lever.

INSURANCE PLAN FOR COUPES

For the past several months I have been working closely with Cdr. Jim Webb at the Webb Insurance Agency on a very special Insurance plan for Cupers. He has talked with underwriters and has used the Club Newsletter to show that we are a good risk and safety conscious pilots. They agreed and we now have one of the best insurance plans in the country! In the back of the newsletter you will find an application that you can fill out and return to Jim for your coverage. If you have any questions he will be glad to answer

them. I have even persuaded him to write a column for the newsletter on insurance and what to look for and what pitfalls to avoid when buying.

I am happy that I have been able to acquire this service for the membership and I hope that you will take advantage of it. The figures that I have seen will surely open your eyes and I am sure they will save you a bundle on your insurance. Many thanks to Jim who likes Coupes and the the people who fly them. -Skip-
